

TaxiTab - A new customer account service for our online customers.

Taxitab is a company that allows customers to pay for their taxi trips in different ways by using safe, accountable and convenient payment methods. Taxitab pays the drivers working on different taxi fleets on a timely basis. Taxitab offers taxi chits for various taxi fleets, and also processes debit and credit card transactions for taxicab drivers. Taxitab will soon offer pre-paid cards for certain fleets and will work with large government accounts that require "universal" taxi chits that are more accountable.
